

## **Guidelines for preparing a student internship reflection essay (one of the elements of passing the student internship)**

**400 – 550 words**

- the essay must refer to the expected learning outcomes of the internship described in the internship syllabus
- the student should demonstrate how he/she implemented the selected learning outcomes described in the internship syllabus
- the student should briefly assess the completion of an internship in terms of achieving the intended learning outcomes contained in the syllabus (whether the professional practice was helpful, why, and to what extent)
- the student - if there is a need - should indicate what should be changed in the internship program to make it more suitable in terms of expected learning effects.
